

```
package oop2;

public class AssertTest {

    public static boolean isEven(int n) {
        return n % 2 == 0;
    }
    public static void main(String[] args) {
        assert isEven(10) == true : "isEven failed for even";
        assert isEven(11) == false : "isEven failed for odd";
    }
}
```
