

```
package inheritance.tableperclass;

import javax.persistence.EntityManager;
import javax.persistence.EntityManagerFactory;
import javax.persistence.Persistence;

public class ListEmployees {

    public static void main(String[] args) throws Exception {
        EntityManagerFactory emf = Persistence.createEntityManagerFactory("mssqlserver_msdb_ddl");
        EntityManager em = emf.createEntityManager();

        var emps = em.createQuery("from inheritance.Employee", Employee.class).getResultList();

        for (var e : emps) {
            System.out.printf("%s\n", e.getName());
        }

        em.close();
        emf.close();
    }
}
```
