

```
package lib1;

import java.time.LocalDateTime;
import java.time.LocalTime;
import java.time.ZoneId;

public class LocalTimeDemo {

    public static void main(String[] args) {
        var now = LocalTime.now();
        System.out.println(now);

        var singtime = LocalTime.now(ZoneId.of("Asia/Singapore"));
        System.out.println(singtime);

        var ct = LocalDateTime.now();
        System.out.println(ct);
    }
}
```
