

```
package app.entities;

public class Category {

    private String code;

    private String description;

    public String getCode() {
        return code;
    }

    public void setCode(String code) {
        this.code = code;
    }

    public String getDescription() {
        return description;
    }

    public void setDescription(String description) {
        this.description = description;
    }

    @Override
    public String toString() {
        return "Category [code=" + code + ", description=" + description + "];"
    }

}
```
