

```
package lib2;

import java.io.BufferedReader;
import java.io.FileReader;
import java.io.IOException;
public class ReadNames {
    public static void main(String[] args) throws IOException {

        var fr = new FileReader("c:\\\\imaginnovate3\\names.txt");
        var br = new BufferedReader(fr);

        while (true) {
            var line = br.readLine();
            if (line == null) // EOF
                break;

            System.out.println(line);
        }

        br.close();
        fr.close();
    }
}
```
