

```
package lib1;

public class TestCustomer {

    public static void main(String[] args) {
        var c1 = new Customer("Andy", "andy@gmail.com");
        var c2 = new Customer("Andy", "andy@gmail.com");

        System.out.println(c1.name());
        System.out.println(c1.equals(c2));
    }
}
```
