

```
package lib2;

import java.io.IOException;
import java.nio.file.Files;
import java.nio.file.Path;

public class SortNames {

    public static void main(String[] args) throws IOException {
        Files.lines(Path.of("c:\\\\imagination3\\names.txt"))
            .distinct()
            // .filter(s -> s.length() >= 4)
            .sorted( (s1,s2) -> s1.length() - s2.length())
            .forEach( s -> System.out.println(s.toUpperCase()));
    }
}
```
