

```
package lib2;

import java.io.RandomAccessFile;

public class WriteMarks {

    public static void main(String[] args) throws Exception {
        try (var raf = new RandomAccessFile("c:\\\\imaginnovate3\\marks.dat", "rw")) {
            for (int i = 1; i <= 20; i++) {
                raf.writeInt((int) Math.round(Math.random() * 99));
            }
        }
    }
}
```
