

```
package oop2;

public class ExDemo {

    public static void main(String[] args) throws InterruptedException {
        int v = Integer.parseInt("100");

        Thread.sleep(1000);

        try {
            int n = Integer.parseInt("0");
            System.out.println(100 / n);
        } catch (NumberFormatException ex) {
            System.out.println("Sorry! Invalid Number!");
        } finally {
            System.out.println("Finally!");
        }

        System.out.println("The End");
    }
}
```
