

```
package test;

class A {
    private int v1 = 10;
    class Inner {
        public void print() {
            System.out.println(v1);
        }
    }
    public void print() {
        var obj = new Inner();
        obj.print();
    }
}

public class InnerTest {
    public static void main(String[] args) {
        var obj = new A();
        obj.print();
    }
}
```
