

```
package lib1;

public class InvertCase {

    public static void main(String[] args) {
        StringBuffer sb = new StringBuffer("Java");

        for (int i = 0; i < sb.length(); i++) {
            char ch = sb.charAt(i);

            if (Character.isUpperCase(ch))
                sb.setCharAt(i, Character.toLowerCase(ch));
            else
                sb.setCharAt(i, Character.toUpperCase(ch));
        }

        System.out.println(sb);
    }
}
```
