```java
package lib2;

import java.io.FileWriter;
import java.io.IOException;

public class WriteNames {

    public static void main(String[] args) throws IOException {
        String[] names = { "Steve", "David", "Jack", "Micheal" };

        try (var fw = new FileWriter("c:\\imaginnovate3\\names.txt", true)) {

            for (var s : names)
                fw.write(s + "\n");

        }
    }

}
```
