```java
package lib1;

public class Person {
    private String name;
    private int age;

    public Person(String name, int age) {
        super();
        this.name = name;
        this.age = age;
    }

    @Override
    public String toString() {
        return this.name + " - " + this.age;
    }

    @Override
    public boolean equals(Object obj) {
        if (obj instanceof Person other) {
            return this.age == other.age && this.name.equals(other.name);
        } else
            return false;
    }

    @Override
    public int hashCode() {
        return this.age;
    }
}
```
