```java
package inheritance;

import javax.persistence.EntityManager;
import javax.persistence.EntityManagerFactory;
import javax.persistence.Persistence;

public class ListPersons {

    public static void main(String[] args) throws Exception {
        EntityManagerFactory emf = Persistence.createEntityManagerFactory("mssqlserver_msdb_ddl");
        EntityManager em = emf.createEntityManager();

        var persons = em.createQuery("from Player", Person.class).getResultList();

        for (var p : persons) {
            System.out.println(p.getClass());
            System.out.printf("%s\n", p.toString());
        }

        em.close();
        emf.close();
    }
}
```
