```java
package concurrency;

import javax.persistence.EntityManager;
import javax.persistence.EntityManagerFactory;
import javax.persistence.Persistence;

public class AddPerson {
    public static void main(String[] args) throws Exception {
        EntityManagerFactory emf = Persistence.createEntityManagerFactory("mssqlserver_msdb_ddl");
        EntityManager em = emf.createEntityManager();

        Person p = new Person();
        p.setName("Srikanth");

        em.getTransaction().begin();
        em.persist(p);
        em.getTransaction().commit();

        em.close();
        emf.close();
    }
}
```
