```java
package jdbc;

public class CatAvgPrice {
    private String code;
    private double avgPrice;

    public CatAvgPrice(String code, double avgPrice) {
        super();
        this.code = code;
        this.avgPrice = avgPrice;
    }

    public String getCode() {
        return code;
    }

    public void setCode(String code) {
        this.code = code;
    }

    public double getAvgPrice() {
        return avgPrice;
    }

    public void setAvgPrice(double avgPrice) {
        this.avgPrice = avgPrice;
    }

}
```
