```java
package onetomanyud;

import javax.persistence.EntityManager;
import javax.persistence.EntityManagerFactory;
import javax.persistence.Persistence;

public class TestProxy {

    public static void main(String[] args) throws Exception {
        EntityManagerFactory emf = Persistence.createEntityManagerFactory("mssqlserver_msdb");
        EntityManager em = emf.createEntityManager();

        var prod = em.getReference(Product.class, 101);
        System.out.println(prod.getClass());
        System.out.println(prod.getName());
        em.close();
        emf.close();
    }
}
```
