```java
package inheritance.tableperclass;

import javax.persistence.EntityManager;
import javax.persistence.EntityManagerFactory;
import javax.persistence.Persistence;

public class AddEmployees {
    public static void main(String[] args) throws Exception {
        EntityManagerFactory emf = Persistence.createEntityManagerFactory("mssqlserver_msdb_ddl");
        EntityManager em = emf.createEntityManager();

        Consultant c = new Consultant();
        c.setName("Jackson");
        c.setRate(100);

        SalariedEmployee  s = new SalariedEmployee();
        s.setName("David");
        s.setSalary(10000);

        em.getTransaction().begin();
        em.persist(c);
        em.persist(s);
        em.getTransaction().commit();

        em.close();
        emf.close();
    }
}
```
