```java
package oop1;

public class AccountArray {

    public static void main(String[] args) {
        Account [] accounts = new Account[10];

        accounts[0] = new Account(1, "Abc", 10000);

        System.out.println(accounts[0].getBalance());

    }

}
```
